OTHERS PRESENT: Ryan Castor of Burns McDonnell.

MINUTES

Mr. Castor presented the Current Damage Assessment and Bridge Replacement report which fulfills Task 4 of the contract. The Task Force discussed the report and the information provided in the report.

Mr. Castor also presented a map of the Little Sugar Creek Watershed. A comparison of the amount of developed land in the watershed from 1997 to 2017 provides a clear demonstration as to why the amount of waterflow has increased.

The Task Force discussed the impact of the dam at Lake Bella Vista. Mr. Castor stated that for smaller 25 year floods, the dam does have a positive impact by collecting water and slowing it down. Beyond a 25 flood, the volume of water is too much for the dam to provide any relief.

The meeting concluded at 4:00 P.M.
