

YARD WASTE MANAGEMENT IN BENTON COUNTY

Yard Waste (sometimes called Green Waste) consists of vegetative or organic material produced from the care and maintenance of landscaped areas, gardens and lawns.

Common Examples of Yard Waste:

GRASS CLIPPINGS

LEAVES

BRUSH

LIMBS & BRANCHES

The most effective and inexpensive way for you to manage your yard waste is to **use conservation practices** such as:

1. Cutting your grass more frequently without bagging it, referred to as grass-cycling.
2. Mulch leaves in place with your lawn mower to put valuable nutrients back into your soil.
3. Implement a home composting area. Gather leaves and other yard waste and kitchen scraps into a compost pile. Let decompose and then use on your garden and lawn next growing season. For guidance on setting up your own composting area, please visit the Composting page at www.gorecycle.us

However, if you can't or don't wish to employ these measures, **there are other options available** for disposal of your yard waste.

PLEASE CONTACT THE APPROPRIATE PROGRAM DIRECTLY FOR APPLICABLE RULES!

If you live inside the city limits, your waste hauler may provide an option for a special yard waste cart for weekly collection. Bentonville and Rogers residents have drop off facilities available as well. See the list on the back of this flyer for information.

If you live outside of a city OR operate a business, you can utilize the District's facility in Centerton or the Eco-Vista Landfill Compost Facility in Tontitown. Both of these programs charge fees based on the amount of material you drop off. See back of flyer for phone numbers.

DID YOU KNOW?

The combination of rainfall with leaves on our driveways, sidewalks, streets, and parking lots can result in clogged storm drains and flooded streets and yards!
