# BENTON COUNTY YARD WASTE DISPOSAL OPTIONS

## Common Examples of Yard Waste:

<p><b>GRASS CLIPPINGS</b></p> 	<p><b>LEAVES</b></p> 
<p><b>BRUSH</b></p> 	<p><b>LIMBS &amp; BRANCHES</b></p> 

**The most effective and inexpensive** way for you to manage your yard waste is to **use conservation practices** such as:

1. Cutting your grass more frequently without bagging it, referred to as grass-cycling.
2. Mulch leaves in place with your lawn mower to put valuable nutrients back into your soil.
3. Implement a home composting area. Gather leaves and other yard waste and kitchen scraps into a compost pile. Let decompose and then use on your garden and lawn next growing season. For guidance on setting up your own composting area, please contact the U of A Cooperative Extension office or visit their website at [www.uaex.edu/yard-garden/vegetables/compost.aspx](http://www.uaex.edu/yard-garden/vegetables/compost.aspx)

However, if you can't or don't wish to employ these measures, **there are other options available** for disposal of your yard waste.

**Please contact the District if you have questions about managing your yard waste.**

**Phone: (479) 795-0751**
